CCP8 (Pericentromeric) FISH Probe

Introduction

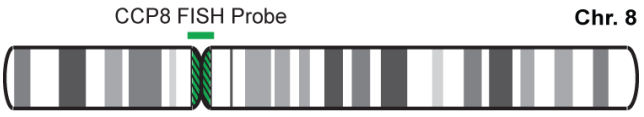
Chromosome counting probe 8 (CCP8 Pericentromeric) FISH Probe is designed to determine the copy number of human chromosome 8 and to detect copy number aberrations in this chromosome, in metaphase and interphase blood and tissue cells.

Intended Use

To measure the copy number of the human chromosome 8.

Cont.	Color
CCP8 (Pericentromeric) FISH Probe	CytoGreen

Probe Design



Not to Scale

CCP8 (Pericentromeric) FISH Probe, recognizing the pericentromeric regions around the centromere of chromosome 8, is designed to determine the number of chromosome 8 copies per cell.

Cat. No.	Volume
